

Not All Visual Acuity Systems Are Created Equal.

Stimuli™ CVT Plus
24-2980

The new Stimuli™ CVT Plus from Accutome is a completely self contained visual acuity system that can hang on a wall or sit on a small shelf or cabinet at the end of any refracting lane.

- Versatile - The Stimuli™ can be calibrated in seconds to meet the needs of different room types including long, short, or folded exam rooms for direct or mirrored examinations.
- Easy-to-use - Specially designed glow-in-the-dark remote allows user to master functions in minutes and remain in eye contact with patient.
- Randomization - Eliminates patient memorization with one touch.
- Enhance Patient Experience - Easily play movies, videos, pictures and music with Front Row software. Also contains internal DVD player.
- Perfect for Children - Children's symbols, movies and fixation targets for pediatric patients.
- Protect Your Investment - Upgradeable software.

TESTS INCLUDE:

- Multiple Optotypes (Letters, Numbers, Children's Symbols, etc.)
- Contrast Sensitivity
- Red/Green Duochrome
- 4-Dot
- Astigmatic Dial

It is the only Patented Computerized Visual Acuity System based on International Standards that supports Vision Testing, Contrast Sensitivity, and customizable Patient Education in an all-in-one design.
