Translucent Low Contrast Charts (10 Feet, 3 Meters)

Testing is identical to the measurement of visual acuity at high contrast level; i.e., to measure the smallest size of the optotypes that an individual can recognize. The 2.5% test is the most practical test in clinical use. Available in 5 contrast levels: 1.25%, 2.5%, 5%, 10%, and 25%. Each chart includes response key, flash cards, recording forms, and instructions.

Low Contrast Flip Charts

Now it's easy to measure, record and detect changes in the transfer of visual information when the change only affects visual acuity at low contrast levels. Charts appear in the following contrast levels: black, 25%, 10%, 5%, 2.5%, and 1.25%. Pages are offset for easy flipping. Each chart includes recording forms and instructions. 6 pages, 3.25" x 9" (8.25 cm x 22.9 cm).
