**Lissamine Green**  
(box of 100)  
Lissamine Green ophthalmic test strips for evaluating corneal and conjunctival problems. Unlike Rose Bengal, it is sting free.  
Item # 9003

**RoseGlo**  
(box of 100)  
Rose Bengal ophthalmic strip for evaluating corneal and conjunctival problems.  
Item # 9004

**SoftGlo**  
(box of 50)  
Large molecule fluorescein ophthalmic strip for evaluating soft contact lens fittings, difficult to see scribe marks on soft toric lenses, and corneal problems. Safe to use with soft contact lenses.  
Item # 9005

**TearFlo**  
(box of 100)  
Schirmer type tear test strip for measuring and recording tear volume.  
Item # 9006

**Fluorescein/Benoxinate**  
(5 mL bottle with dropper)  
Combination Fluorescein disclosing agent and Benoxinate as an anesthetic, useful in foreign body removal and applanation tonometry.  
Item # 2001

**Fluorocaine**  
(5 mL bottle with dropper)  
Combination Fluorescein disclosing agent and Proparacaine as an anesthetic, useful in foreign body removal and applanation tonometry.  
Item # 2101

**Flura-Safe**  
(6 mL bottle with dropper)  
Large molecule Fluorescein in combination with Benoxinate as an anesthetic. Can be used in foreign body removal, applanation tonometry, rigid or soft contact lens fittings, evaluation of corneal and conjunctival problems.  
Item # 2201

**Injectable Fluorescein**  
(10% 5 mL and 25% 2 mL)  
Injectable Fluorescein and Fluorescein Sodium in light and dark formulations used as an injected disclosing agent during Fluorescein Angiography.  
Dark 10% - Item # 8001  
Dark 25% - Item # 8002  
Lite 10% - Item # 8003  
Lite 25% - Item # 8004
Homatropine (5% 5 mL)
Long lasting cycloplegic eyedrop that dilates the pupil and paralyzes accommodation.
Item # 7005

Phenylephrine
(2.5% in 5 mL and 15 mL also 10% 5 mL)
Eyedrop for the dilation of the pupil.
2.5% 5 mL - Item # 7006
2.5% 15 mL - Item # 7007
10% 5 mL - Item # 7008

Goniovisc (Hypermellose)
(2% or 2.5% in 15 mL)
HPMC solution used as a fluid bridge between the cornea and an examination contact lens in a procedure called gonioscopy which looks at the anterior chamber angle of the eye.
Item # 7004

Phenylephrine (2.5% in 5 mL and 15 mL also 10% 5 mL)
Eyedrop for the dilation of the pupil.
2.5% 5 mL - Item # 7006
2.5% 15 mL - Item # 7007
10% 5 mL - Item # 7008

Sodium Chloride
(In 15 mL solution or 3.5 gm ointment)
Hypertonic Sodium Chloride solution or ointment used in the treatment of Corneal Edema by dehydrating the cornea that is swollen with water.
Solution - Item # 7009
Ointment - Item # 7010

Tetracaine
(12 X 0.7 mL dropperettes or 15 mL)
Topical anesthetic used for corneal procedures requiring anesthesia. Dropperettes are double sterile wrapped and ready for surgery.
0.7 mL - Item # 7011
15 mL - Item # 7012

Eye Wash
(2 oz & 4 oz)
Irrigating solution for topical rinsing of the eye.
2 oz - Item # 7001
4 oz - Item # 7002

Balanced Salt Solution
500 mL, 250 mL & 18 mL
Ophthalmic irrigation solution with a connector for cannula attachment. Great for refractive or cataract procedures. All products are terminally steam sterilized with no EtO residuals and is latex free.
500 mL/glass - Item # 6001
500 mL/plastic - Item # 6101
250 mL/plastic - Item # 6201
18 mL - Item # 6301
