

EYEMEDIA WITH TOUCH SCREEN.
EXPECTING MORE.

EYEMEDIA. THE SOLUTION FOR IMAGING MANAGEMENT IN DIAGNOSTIC AND SURGERY IS ALL IN ONE.

EYEMEDIA is an innovative integrated system for video recording and digital filing of medical videos. It is easy to use thanks to its intuitive touch screen system; it represents the last evolution in patient imaging data management.

RECORDING

Just connect a video camera to EYEMEDIA in order to acquire high quality videos. It can be connected to 4K lenses, surgical microscopes and to most medical imaging devices.

FILEING

Videos are compressed before being stored in the hard disk drive, allowing the easy filing of thousands videos.

EDITING

EYEMEDIA is equipped with an intuitive editing panel enabling video editing through a simple touch of the screen.

MANAGING

Acquired videos are saved into EYE MEDIA database matched with patient useful information (patient data, surgery, procedure). Videos can be easily reported and used during training and scientific activities.
