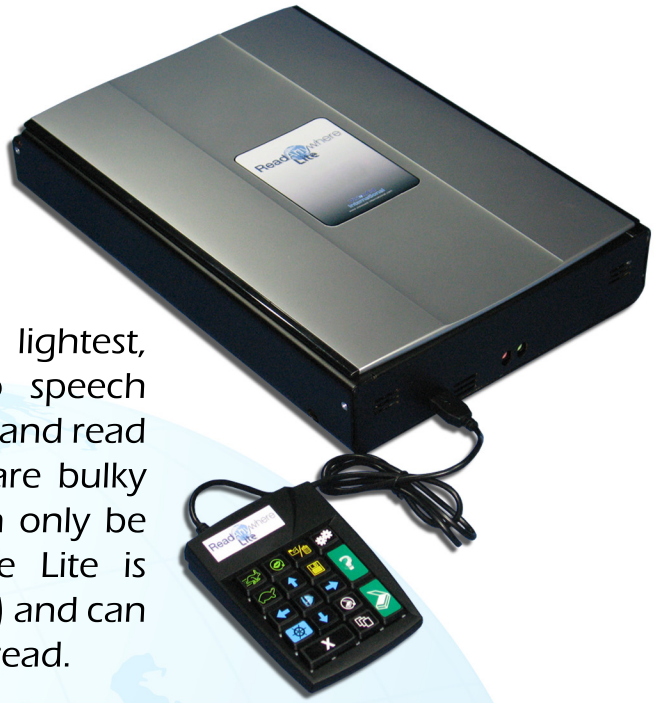
ReadAnywhere Lite



ReadAnywhere Lite is the World's smallest, lightest, and most cost effective portable text to speech reading machine. It will scan any printed text and read it out loud. Most other reading machines are bulky and mains powered meaning that they can only be used in one location. The ReadAnywhere Lite is battery powered and weighs just 3 kg (6.6lbs) and can be transported easily wherever you need to read.

ReadAnywhere Lite benefits:

- Extremely simple to use and all of its features can be accessed by pressing one button on the keypad.

- 40 seconds to scan and recognise a page before it starts reading aloud.
- Weighs just 3.0 kg (6.6 lbs) and is no larger than a laptop
- Built in storage allowing up to 10,000 pages to be saved. They can be retrieved quickly and easily again by saving a recorded audio tag from ReadAnywhere Lite's built in microphone
- Highly accurate. Documents with coloured backgrounds and small text (down to 4pt) are all read expertly
- Includes carry case and headphones
